SKILLS

- Python
- Flask
- SQL
- AWS
- Salesforce Backend
- REST APIs
- Selenium
- Pandas
- Git
- Containers
- Datadog
- Postman
- RPA (UiPath)

AWARDS

- Golden Key Award
- Postgraduate Merit Award
- *Merit Awards*: Linear Algebra; Number Theory; Coding and Cryptography; Complex Analysis
- *First Class Award*: Basic Analysis; Leontief Systems; Group Theory

ABOUT ME

Backend-focused Python developer with experience building automation systems, decision engines and scalable backend processes. Strong background in mathematics and analytical problem solving. Experienced in Python, RPA, relational databases, Salesforce backend systems, and AWS environments. Passionate about clean code, documentation, unit tests, and continuous learning.

EXPERIENCE

Python Developer

TecEx | 2021 – Present

- Designed and maintained backend automation processes using Python and RPA.
- Contributed to the architecture and optimisation of a Python-based Decision Engine used to dynamically evaluate compliance rules and enforce business logic across distributed systems.
- Integrated rule validation workflows into CI/CD pipelines to ensure rule integrity before deployment.
- Refactored legacy workflows to improve maintainability and test coverage.
- Implemented structured logging and monitoring using Datadog.
- Designed and maintained database-backed integrations with Salesforce's relational databases.
- Built and maintained Flask applications and API integrations.
- Worked with relational databases and Salesforce backend systems.
- Performed code reviews and contributed to version control best practices (Git).
- Mentored junior developers and supported onboarding of graduate hires.
- Utilised AWS, containers, Selenium, pandas, requests, Postman and Datadog in production environments.
- Created and maintained unit tests (pytest) and technical documentation.

Student Teacher

University of the Witwatersrand | 2020-2021

- Planned, prepared and delivered lessons.
- Mentored and taught high school students IEB mathematics.
- Participated in monitoring extra mural sports.

Archaeology Tutor Lab Assistant

University of the Witwatersrand | 2018-2020

- Planned, prepared and delivered lessons.
- Collected and analysed archaeological data.
- Organised comparative and archaeological specimens
- Summarised and reported both quantitative and categorical data.
- Used hypothesis testing and other statistical tests.

University Mathematics Tutor

University of the Witwatersrand | 2016

- Tutored university students core mathematics as a part of a program set by IBM.
- Planned, prepared and delivered tutorials.
- Ensured strong conceptual understanding of core mathematical principles.

EDUCATION

PGCE with distinction

University of the Witwatersrand 2020-2021

FET Mathematics, Senior Phase Mathematics, Theory of education, South African Sign Language

Master of Science

University of the Witwatersrand 2018-2020

Archaeology by dissertation

Bachelor of Science with Honours

University of the Witwatersrand 2012-2017

Mathematics I, II & III; Archaeology I, II, III, IV; Computational Applied Mathematics I; Physics I, Chemistry I,
